

Policy Code: 5021 Foreign Student Visitors

The Superintendent may approve short-term foreign student visitor programs to permit foreign high school aged students to attend school as observers/visitors for up to one week.

Such programs should be approved by the principal only if they benefit the school community. The superintendent shall adopt administrative procedures for any approved programs. At a minimum, the regulations should provide for pre-approval for visits made under this policy, adequate screening of candidates, adequate planning for any approved visit, and monitoring to ensure that placement of foreign students benefits and does not disrupt the school mission.
